This is a Chevrolet Corvette C5-R scale model STL 3d printable car for display and diorama projects, great for searches like corvette c5-r stl, race car model, and sports car 3d print. You get a detailed, realistic centerpiece for desk display, model collections, shelf decor, and tabletop scene building with track-day or motorsport themes. The file is a print-ready model that is prepared in a slicer before publishing, so you can start printing with confidence right after the first layer. Sliced with 0.20 mm layer height, a 0.4 mm nozzle, 15% grid infill, 2 wall loops and PLA (supports: tree(auto)). Profile prepared on a Bambu Lab A1. Scale - 1:10. You also get the 3MF project file, not just the raw mesh.
