Jen - Night in the Woods Figurine is a character figurine 3d model from the video game series, available as an stl for 3d printing and display. Print it for desk and shelf collection, tabletop decoration, or as a game-themed gift and diorama piece. This is a print-ready model prepared in a slicer before publishing, so there is no guesswork before the first layer. Sliced with 0.20 mm layer height, a 0.4 mm nozzle, 15% grid infill, 2 wall loops and PLA (supports: tree(auto)). Profile prepared on a Bambu Lab A1. Scale - 1:10. You also get the 3MF project file, not just the raw mesh.
