Summary

Articulated crocodile with 2 lego-compatible studs for figurine or base mounting

[Toys & Games](#) > [Building Toys](#)

An articulated croc with lego-compatible studs for attaching figurines or building a mobile base on. Could be used as a display piece for figurines. Very strong when printed in PETG. Printed on .4 noz .2 std. No brim, no supports, prints flat.

Do not recommend trying to print more than one at a time unless you have the stud layers configured to allow for extra cooling time etc. I have had no success with the figurines securely attaching if printing more than one at a time.
