Multi-Color Benchy (4 Colors / AMS & MMU Ready)

Welcome! Here is the iconic **3D Benchy** optimized for **4-color printing**!
No manual color painting required in your slicer. Simply load the pre-configured .3MF file, assign your filaments, and start printing!

Print Settings

- **Printer Compatibility:** Any multi-color setup (Bambu Lab AMS, Prusa MMU3, Anycubic ACE Pro, etc.)
- **Number of Colors:** 4
- **Layer Height:** 0.2 mm (or 0.16 mm for finer details)
- **Infill:** 10% - 15% (Gyroid or Grid)
- **Supports:** None / Not needed
- **Brim:** Not required (unless you have bed adhesion issues)

Included Files

- .3MF **File Only** – Fully pre-arranged multi-part 3D model with pre-assigned color slots for quick and easy slicing.

How to Use

1. Download and open the .3MF file in your preferred slicer (Bambu Studio, PrusaSlicer, OrcaSlicer, etc.).
2. Assign your 4 chosen filament colors/spools to the corresponding parts in the object list.
3. Slice and send to your printer!

Don't forget to post your Makes! I'd love to see your unique color combinations.

If you enjoyed this print, please leave a **Like** and **Follow** for more models!

Happy printing!
