Flashforge AD5X Spool Holder Adapter for Elegoo Centauri Carbon 2 (CC2)

I love my Elegoo Centauri Carbon 2, but there's one thing about it that has been driving me crazy: the original spool holder.

When using plastic spools with grooves or notches around the center hole, such as those from Elegoo, Creality, and other brands, the holder's rods tend to get stuck or pop out of place. It can be really annoying, especially when changing spools or handling filament.

So, I decided to do something about it!

I designed this adapter to allow the use of the Flashforge AD5X spool holder on the Elegoo Centauri Carbon 2. In my opinion, this is a simple but worthwhile upgrade that makes spool handling much less frustrating.

Why this adapter?

- Use the Flashforge AD5X spool holder on your Elegoo Centauri Carbon 2.
- Avoid the hassle of the original holder getting caught on spool grooves.
- Enjoy a more convenient spool setup, especially with plastic spools from brands like Elegoo and Creality.

This is a personal solution to a small but annoying problem, and I thought other CC2 owners might find it useful too.

Happy printing! ☺
