Summary

Box that catches the "poop" when the printer purges at color changes

[3D Printers](#) > [Anycubic Parts & Upgrades](#)

A very simple box to print that attaches using a standard "Harbor Freight" or "Hobby Lobby" magnet to the outside of the printer to capture the purge waste as it is discharged at color changes during printing. Before I had this box I literally had 100s of little plastic "poops" all over the desk and floor! Now they are contained and easy to discard.
