Summary

A part that goes between Xiaomi 50W Wireless Charger Pro and Xiaomi 17 Ultra with photography kit case on.

Tags: [wirelesscharger](#) [xiaomi](#)

Made this part to keep my Xiaomi 17 Ultra from sliding off of the wireless charger.

It works well but if anything magnetic is closer than 20 centimeters from the charger you have to still detach the camera bump protector on the case to not have failed charging fault on the charger.

Printed and tested out of PLA, there might be risk of melting in summer heat as the phone likes to get hot during the charging.
