Print it in under 10 minutes. Lose it. Print another one. That's the whole point.

Two versions included:

SLIM (8.5mm) – for naked phones

WIDE (10.5mm) – for phones with a case

Features:

PRINTS IN UNDER 10 MINUTES (Sport Mode)

ONLY 3 GRAMS OF PLA

FITS MOST PHONES (with or without case)

VERY EASY PRINT

POCKET-SIZED

SURPRISINGLY STRONG & STABLE

Most phone stands here on MakerWorld are great – but they're quite large, some take hours to print, and they sit permanently on your desk. This one fits in your pocket after you are done with meal-time-watching.

In the last revision I added a small hole to attach it to my keys or something.

Print Instructions:

Prints fine in Sport Mode or even Ludicrous Mode. No supports. No brim needed. Just hit print.

PLA is recommended. Pick the colour and brand you like! :)
