de Havilland Tiger Moth stl for 3d printing: a detailed scale model aircraft plane for display and diorama projects. Great for aviation collectors, model builders, and tabletop scenery, and it works well as a centerpiece for vintage aircraft themed builds. This is a print-ready 3d model prepared for publishing in your slicer, so you can start with confidence right before the first layer. Sliced with 0.20 mm layer height, a 0.4 mm nozzle, 15% grid infill, 2 wall loops and PLA (supports: tree(auto)). Profile prepared on a Bambu Lab A1. Scale - 1:10. You also get the 3MF project file, not just the raw mesh.
