This Harley-Davidson Fat Boy scale vehicle model is a 3d printable motorcycle stl for collectors, dioramas, and display builds, capturing the iconic fat boy cruiser style. Get a detailed model you can use for desktop display, tabletop scenery, motorcycle themed decor, and custom garage or man cave collections. The file is a print-ready 3d model prepared in a slicer before publishing, so there is no guesswork before the first layer. Sliced with 0.20 mm layer height, a 0.4 mm nozzle, 15% grid infill, 2 wall loops and PLA (supports: tree(auto)). Profile prepared on a Bambu Lab A1. Scale - 1:10. You also get the 3MF project file, not just the raw mesh.
