updated 10. 10. 2026 | published 10. 10. 2026

Summary

This can be used to fit a compression tweeter onto a flat surface with 2 bolts on the sides with variable distances.

Originally made to fit a DD Audio VO-CT45 into an unknown horn, the mounting was just 2 bolts, i was too lazy to get the distances right so i decided to solve 2 problems with a single shortcut, i made the mounting holes accept a small range of distances so it will work in my use case and even some other use cases.
