Summary

This is a blob emoji holding a customizable sign, which you can then print out and hang as a sign!

Blob emoji lovers- this is for you. This blob is holding up a blank sign, which you can customize with words or images. You can then print out the blob to let the world know its message. My version is a no solicitors sign and the words were embossed in Orca Slicer.

I also added a hole for hanging my sign near the top of the blob, though it's not in the model.

Created based on the sign blobs from <https://blobs.gg/>.

My print was made on a Bambu Labs X2D and sliced with Orca Slicer with the following settings:

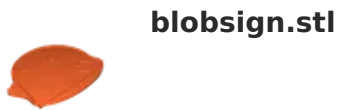

- Ironing: all top surfaces
- Wall generator: arachne
- Infill: Gyroid, 5%

- 0.2mm nozzle
- 220 °C/55 °C nozzle and heat bed temperature

I used PLA for all three colors. The outlines of the model are higher than the inside so that you can easily print them in a different color.

Have fun!
