Nano-Tamagotchi's didn't quite fit correctly on Colld's original Tama-stand; they were resting on the table under the stand. I've added some legs, raising the cradle so nano-Tamagotchi's are fully supported, and tried to make the stand a little prettier.

When printing, print two sides and two connecting rods. I would recommend using a brim. They should press fit together.

The freecad files are attached for any modifications/remixes.
