Let me clarify that its bad, i did it quickly and without much thinking. I just wanted a grip real quick and because i couldn't find another stl file online i tough ill share this one at least.

Please notice that it doesn't go all the way up like most of others grips i saw online about similar consoles so it isn't similar to a PS/XBOX joystick, the buttons are a bit higher so it may feel weird to other people.

I could think of a way to make it support-less so i recommend printing it upside down

edit: i added another UNTESTED version (v2) with a higher grip (or lower buttons idk. It may have some dumb mistake
