### Summary

Scan of the large storage area immediately in front of the radio area.

[Hobby & Makers](#) > [Automotive](#)

Tags: [titan](#) [nissan](#)

Scanned the console area of the 2nd gen Nissan titan so you can use it to model your own inserts/attachments.

Includes STL. Raw scan files are >2GB and won't upload here. Message me with a link to somewhere I can put them if you want them to import into Creality Scan or whatever.

### Model files
