This siren is a unique one! Its 8/16 port and an awesome add to your collection. This siren uses primarily M6 bolts. The pole mount is designed for a 3/4 inch 10ft tall stainless steel conduit "pole" at your local hardware store probably. This siren requires a samsung microwave blower motor (110v) so if you aren't familiar with working with 110v, this siren is not for you. Dont get the forbidden tinglies. Everything is already in the proper print orientation.

Motor: Samsung Microwave Blower Motor

Hardware: M6 bolt set

Enjoy your build.
