A simple stand for toilet paper roll stand, flat and have bump to stop it from sliding off.

It is printed in 2 parts, then you push center part into the base. It's inference fit, but it can easily be glued if it needs to be.

For when you just want to put toilet roll on flat surface rather have wall roll holders of some kind.

Model files

tprollstand-tpboss.step

☐ Center insert

tprollstand-tpbase.step

📄 The base

tprollstand.fcstd

📄 The freecad file, if you want to modify it, or to remake center insert to be rod or something.
