THE PAIR OF SPIRAL FIDGETS!!!!

So i finally decided to make my first spiral and twist fidgets!!!!!!

This project includes a spiral passthrough fidget and a spiral twist fidget, both designed in onshape.

Spiral Passthrough fidget-

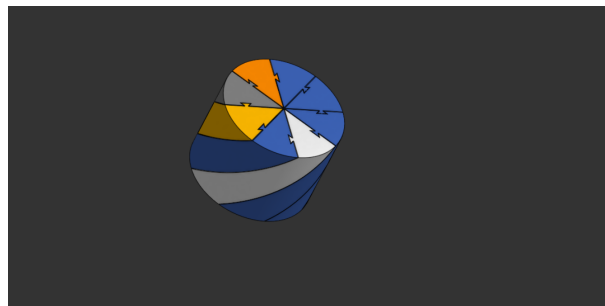

It is a spiral fidget in the shape of a cone... i chose this basic shape since this was my first spiral fidget and i didnt want it to be too complex for a first one.

It comes in two parts the outer spiral and the inner spiral-

The outer spiral is the blue part u can see in the image and the inner one is the white part u can see...

The inner part goes through the outer part in a spiral manner and passes through it, this is extremely satisfying!

Spiral Twist fidget-

This has many different parts however it is printed at the same time so like u don't need to print the parts separately it is one model that prints perfectly without separating it!!!

This too is a basic cylindrical shape since i didnt want complex ones for my first spiral fidgets.

This basically falls down and stops and will look something like this.. pretty satisfying right? --->
