Summary

Most stands felt dull, so I decided to create my own designs that better reflect my aesthetic.

[aesthetic](#) [dmg](#) [collectibles](#)

Here's a stand I designed to match the aesthetic of my collection! Feel free to use it if you like the look.

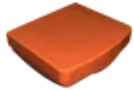

I also included a cutting tool (STEP) so you can create a stand to fit your own style. Just place the tool where you want the cut and cut away! For my Game Boys, I used a 10° angle.

I made stands for both the original Game Boy (DMG) and the Game Boy Color (GBC), so check out my profile to find them!
