IKEA SKÅDIS Modular Container - 120 Size Combinations

One design. 120 ways to organize.

A versatile container designed for the IKEA SKÅDIS pegboard system. Choose the width, depth, and height that best fit your needs — from compact holders for small accessories to larger containers for tools and supplies.

Every variant features a built-in label pocket, making it easy to identify the contents and keep your workspace organized.

Key Features

- **No supports required** – designed for easy 3D printing without support structures.
- **No assembly required** – print the model and mount it on your IKEA SKÅDIS pegboard.
- **Built-in label pocket** – add a label to identify the contents at a glance.
- **120 size combinations** – mix and match different widths, depths, and heights to suit your needs.
- **Consistent design** – combine containers of different sizes while maintaining a clean, uniform look.

Choosing the Right Size

The model is available in 120 combinations of width, height, and depth.

The STL filename specifies the internal dimensions in millimeters:

container_width92_height55_depth40_container.stl

This example has:

- Internal width: 92 mm
- Internal height: 55 mm
- Internal depth: 40 mm

These are the usable internal dimensions, not the external dimensions of the container.

Printing Recommendations

- **Supports:** Not required.
- **Layer height:** Any layer height can be used. Choose a finer layer height for a smoother finish or a larger layer height for faster printing.
- **Brim:** Consider using a brim if your printer has adhesion issues or if the selected filament tends to warp.

No special printing tricks or post-print assembly are needed.

Designed for Everyday Organization

Use the containers to organize screws, electronic components, tools, stationery, craft supplies, and other small items. Combine different sizes to make the most of your IKEA SKÅDIS pegboard.

If you have any issues with this model, drop me a line.
