Tags: [door](#) [panels](#) [structural](#) [clickyclack](#)

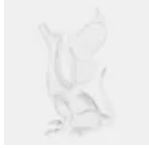

Clicky-Clack Door Modified for use with 6mm Structural Panels. I used these parts for my build with 3mm stainless steel panels and 3mm aluminum spacers on a 2020 frame. Longer hardware is required for anything that bolts to the frame.

This will also work for 6mm panels bolted directly to the frame.

Step files are included so you can modify for panels of a different thickness.
