Following the success of the first two versions, which held one and two cooking utensils respectively, the CookSitter 3.0 is here—with plenty of room for your used cooking spoons. It keeps your work surface clean and is even dishwasher-safe when printed in PETG.

The model's default dimensions are 230 × 200 × 39 mm, and it can be scaled to suit your needs.

The model was printed using the following settings:

- Layer height: 0.2 mm
- Walls: 2
- Infill: 15% grid
- Filament consumption: approximately 172 g
- Filament used: PETG "Mint"
