Summary

You can fill both small and large bottles with one hand.

[Household](#) > [Kitchen](#)

Tags: [holder](#) [funnel](#)

I made a funnel holder for people who, for some reason, can only use one hand. The funnel arm can be adjusted for different bottle sizes. The holder fixes both the funnel and the empty bottle. The practical base with a frame will catch any liquid drops and keep the workbench clean. Ideal for working with SLA resin.

Printing instructions:

For screws: Wall loops = 10, Fill density = 40

For other parts: Wall loops = 4, Fill density = 40

Material: PETG
