Meet the Little Witch Duck!

A cute, chubby duck dressed up for spooky season, complete with a crooked witch hat and little webbed feet. Perfect for adding a bit of Halloween to your desk, shelf, or windowsill.

The model comes in **8 separate pieces**, so you can print each color individually and glue everything together. **No multicolor printer needed!**

I went with a white body, orange bill and feet, black eyes and hat, and an orange hatband—but feel free to mix up the colors.

Printing tips:

- Approximately 120 mm tall when assembled.

- PLA, 0.20 mm layers, 2 perimeters, and 10% infill are a good starting point.
- Use supports where needed under the body, bill, and curled hat tip.
- Included 3mf has settings dialed in for the Prusa Core One

If you print one, share a make—I'd love to see your little witch ducks!

HAPPY HALLOWEEN!
