Meet the newest little creature joining the KOGI3D collection - the Mini Articulated Shark!

I wanted to keep this one **small, cute, and fun to play with**, with a chunky stylized shark design and a flexible articulated body. Give it a little shake and the body and tail wiggle from side to side, making it a fun little desk toy or fidget.

Best of all, the shark **prints completely in place as one piece**, so there are no separate parts, no gluing, and no assembly required. Just print it, free up the joints, and your little shark is ready to swim!

Features

- Cute **Mini Shark** design
- Fully articulated flexible body
- Wiggly moving tail
- **Print-in-place**
- **No assembly or gluing**
- Small and quick to print
- Great for multicolor printing
- Fun as a fidget, desk toy, or little gift

Recommended Print Settings

- **Printer:** FDM
- **Layer Height:** 0.15 mm
- **Infill:** 10-15%
- **Walls/Perimeters:** 2
- **Material:** PLA recommended
- **Nozzle Temperature:** 210-220°C
- **Bed Temperature:** 55-60°C

⚠ **Scaling Notice**

This model has been carefully tuned for smooth articulation at its original size. Scaling the model up or down may change the joint tolerances, causing the joints to become either too tight or too loose.
