The Beast — Bust Inspired by Beauty and the Beast

Inspired by Jeanne-Marie Leprince de Beaumont's fairy tale Beauty and the Beast, this bust offers a sculptural interpretation of the character, combining animal strength with melancholy nobility.

The bestial face, short muzzle and pronounced brow give him an imposing presence. Pupil-less eyes and a closed mouth create a stern, restrained expression. A voluminous mane frames the head and flows over the shoulders in thick, deeply sculpted locks.

The nobleman's clothing, botanically decorated collar and cravat recall the elegance beneath his monstrous appearance. The bust rests on a rectangular pedestal featuring a rose in relief, a reference to the tale.

This creation is a freely imagined artistic interpretation: the animal anatomy and costume are sculptural choices, without attempting to reproduce a film adaptation or any actor's likeness.

The base of this model was generated using **Hi3D**, then refined using **Blender and/or Meshmixer** to create the final bust. If you'd like to
