[hexbit](#) [nosupports](#) [gridfinity](#)

Five Gridfinity bins for the small things that get lost in drawers. Each is filled solid with holes and slots that hold things upright:

- SD and microSD (2x1): 8 SD cards and 10 microSD cards.
- AA batteries (1x1): 4. AAA batteries (1x1): 9.
- 1/4" hex bits (1x1): 16.
- USB-A sticks (1x1): 6.

DETAILS

- Standard Gridfinity feet (42 mm grid) and stacking lip, so they drop into any Gridfinity baseplate.
- Prints with no supports: the holes go straight down into the solid block and the feet use the 45-degree profile. Bambu Studio: 4 h 32, 124 g for all five.
- Gridfinity is an open standard by Zack Freedman.

CUSTOMIZE (OpenSCAD)

Print any one bin on its own.

Designed with AI assistance (OpenSCAD). Rendered images; not printed yet.
