Slide it shut when you're not on a call. A thin sliding shutter that prints already inside its frame: stick the frame over a laptop or monitor camera with a strip of thin double-sided tape and slide to open or close. Six on a plate.

DETAILS

• 34 x 12 x 2 mm, 10 mm window. Check your laptop still closes with it on (2 mm is the usual limit).

• Prints in place with no supports: the shutter runs in V-shaped rails with 45-degree faces and a 0.3 mm gap. Flex it gently after printing to free it.

• Bambu Studio: 16 min, 3 g for six.

CUSTOMIZE (OpenSCAD)

Thickness, window size, gap and how many.

Designed with AI assistance (OpenSCAD). Rendered images; not printed yet.
