Summary

Triangular key for electrical cabinets.

[Hobby & Makers](#) > [Tools](#)

Tags: [key](#) [electrical](#) [traingularkey](#)

Print with:

Adaptive layer height.

A lot of walls (e.g. 20) so that the walls cover all the filled volume of the object (so that no infill is required).

Supports are generally not needed but it is good to support the ceiling of the triangular slot if printing with the slot facing down.

Supports:

Only the triangular slot

Layer height:

0.2mm or adaptive

Infill:

100% (use many walls instead of an infill)

Filament:

PLA (other filaments should work fine as well)
