Uses TT yellow motor. DO NOT supply power from usb unless stepping down to ~3v, two AA or AAA batteries in series work perfectly

You will need two M3 bolts, I used 30mm and two nuts. Go threw the back, pass through the motor and the lid.

Print the heads with 10-15% infill, 2 bottom and lower layers and 2 walls. I remixed this because there was one like it and it has vanished. So im giving it back to the people. remixed from a highly remixed design so it wont disappear on you.

special shout out to this guy for making this reference model of the TT motor. You made my life so easy with this.
