Desk stand for Glock-type airsoft pistols: the pistol stands upright on a tongue that slides into the magazine well.

A compact faceted wedge: the sides of the block run straight into the foot, and the top slopes down in one line to a flat tip under the slide. No step, no join, just one clean shape, with the gregexe crosshair engraved on the side.

Features

- Footprint: 137 × 80 mm, height 92 mm
- Tongue: 33.0 × 22.7 mm section, 60 mm long, angled 12° like the magazine well

- The foot reaches under the slide, where the weight is, so the pistol does not tip forward
- One piece, prints flat with no supports

Compatibility

- Made for airsoft pistols that take Glock-type (G17 / G18 style) magazines.
- Tested on an Action Army AAP-01 and on a Glock airsoft pistol.
- Measure your magazine well before printing: the tongue is 33.0 × 22.7 mm.

Printing

- Material: PLA+ or PETG
- Orientation: flat on the bed, as in the STL file
- Supports: none
- Suggested: 0.2 mm layers, 3 walls, 15 % infill

Files

- gregexe_glock-stand-blade_v3.stl: the stand, ready to print

Important

Display stand for airsoft replicas only. Narrower than the fork version: keep it on a stable surface. Remove the magazine and make sure the replica is safe before placing it on the stand.
