Summary

Addon to the enclosure for Spool Holder & Buffer for Core One MMU3 Community Version

[3D Printers](#) > [Prusa Parts & Upgrades](#)

Tags: [buffer](#) [prusaenclosure](#) [mmu3](#) [enclosuremodification](#)

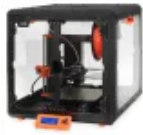

This is an addon for **Spool Holder & Buffer for Core One MMU3 Community Version**.

This adds a Tray to attach to the Prusa Enclosure that give you room for 5 spool buffer rollers and there is a clip made to secure them between the rollers.

to secure you use the threaded holes near the front of the enclosure. there are two extra holes if you want more stability but is not needed.

This model requires a bigger buildplate than the MK4s
