Summary

Shortened Ontos Ravion barrel collet to allow more room for scars.

This is a barrel collet for the Ravion Ontos variant that is shortened by 25mm to allow more room for muzzle devices on a 12inch barrel. I couldn't a SillyButts Spigot Scar onto the muzzle when using a 12inch barrel(default included in OOD kits) so I shortened the collet and now it fits with a millimeter or two of gap.
