Summary

This is a stand for your T-embed CC1101 to display it or have it sit on your desk

I made this stand so you can display or have your T-embed CC1101 sit on your desk.

It is made so you can keep the antennas attached or store them behind within the print.

You are able to charge or flash it while it sits in the stand.

The T-Embed i designed this around is my CC1101 PlusESP32-S3 i am not sure if its the same dimensions as the older models.

If you print this model and like it please share and let me know what you think i would love to see my ideas in the hands of others :)
