Slimer from Ghostbusters Through-the-Window ! No AMS Required

Bring a little Ghostbusters fun to your window with this spooky **Slimer**! Half of the model sits outside while the other half appears inside, creating the illusion that Slimer is crashing right through your window.

I used **3M tape** to attach mine to the glass and it works great! I have also uploaded a magnet version so you can attach your own magnets. There are multiple print profiles I have created. One is plain green that I printed Slimer in **glow-in-the-dark PLA**, and he looks absolutely amazing glowing at night. The other profiles are full color - print by plate so no AMS

is required. I can also upload the full AMS version but that profile is very long. Much easier to print by plate :)

A few printing notes:

- I removed the supports that were originally inside the mouth because they were insanely difficult to remove.
- The arms still have supports, but they come off very easily.
- You may notice a little stringing inside the mouth area. It's super easy to clean up — I literally removed mine with my little finger! 😊

Hope you enjoy having Slimer come crashing through your window!
