[hingedlid](#) [freestl](#)

A small print-in-place hinged box with an inside size of 100 × 60 × 30 mm. The knuckle hinge prints already assembled: the lid lies open 180° behind the box on the bed, so you get a working hinged lid with no supports and no hardware to fit afterwards.

What's included – one STL file:

- box-100x60x30-hinged-lid.stl – inside 100 × 60 × 30 mm, print-in-place hinged lid (print layout with the lid open)

Print settings: PLA or PETG, 0.2 mm layers, 0.4 mm nozzle, 2–3 walls, ~15–20% infill, no supports. Print exactly as oriented in the file — the hinge is designed to print assembled.

Renders shown; real print photos coming soon.

Want another size or lid type? Open <https://3dmakerbench.com/box-generator> – it’s free, runs in your browser and needs no signup: set inside or outside size, pick push-on, magnetic, sliding or hinged lid, add dividers or an engraved label, and download a fresh STL in seconds.
