Tags: [contest](#) [racingsimulator](#)

A custom sim racer shifter knob add on for the TH8S shifter. The design features an elevated and open to air grip handle for light and comfortable full hand grip access with the option of a sideways fist grip or a horizontal fist grip to ensure comfortable choice of handle for optimal racing. Ideally to be used by someone who prefers a more full and open grip and enjoys the option of a different angle to place the shift device such a close shift where the arm can be in an L shape facing straight down or straight forward.
