Summary

Bring a little motion to your Halloween setup with this Skeleton Moon Ghost Swing.

Household > Home Decor

Bring a little motion to your Halloween setup with this **Skeleton Moon Ghost Swing**. The ghost sits securely on a functional hanging swing, and an **LED tealight can be placed inside the ghost** to illuminate the eyes. The swing can move freely, making it a fun display piece for a desk, shelf, or Halloween setup.

Assembly

1. Assemble the Moon

Glue the **skeleton moon onto the base moon**. For a stronger bond, I recommend carefully heating the bottom contact surface of the skeleton moon with a lighter for just a moment, then immediately pressing it firmly onto the base moon. Alternatively, standard glue suitable for your filament can be used.

2. Add the Swing Strings
Any type of string works. I used **crochet yarn**, but twine, fishing line, thread, or similar string can also be used.

Cut **two strings to exactly the same length** so the swing hangs level. For each string:

- Glue one end underneath one side of the swing.
- Feed the string through the corresponding hanging hole on the moon.
- Bring it down and glue the other end underneath the opposite side of the swing.
- Repeat with the second string on the other side.

Keeping both strings identical in length will help the swing stay straight and balanced.

3. Attach the Ghost
Place the ghost on the swing and **wrap its arms around the swing strings**. This helps secure the ghost so it stays on the seat while the swing is moving.

4. Add the Light
Place an **LED tealight inside the ghost** to illuminate the eyes and complete the display.

A simple print with a fun interactive element—give the swing a gentle push and let your little ghost enjoy the ride.
