Magic Cube

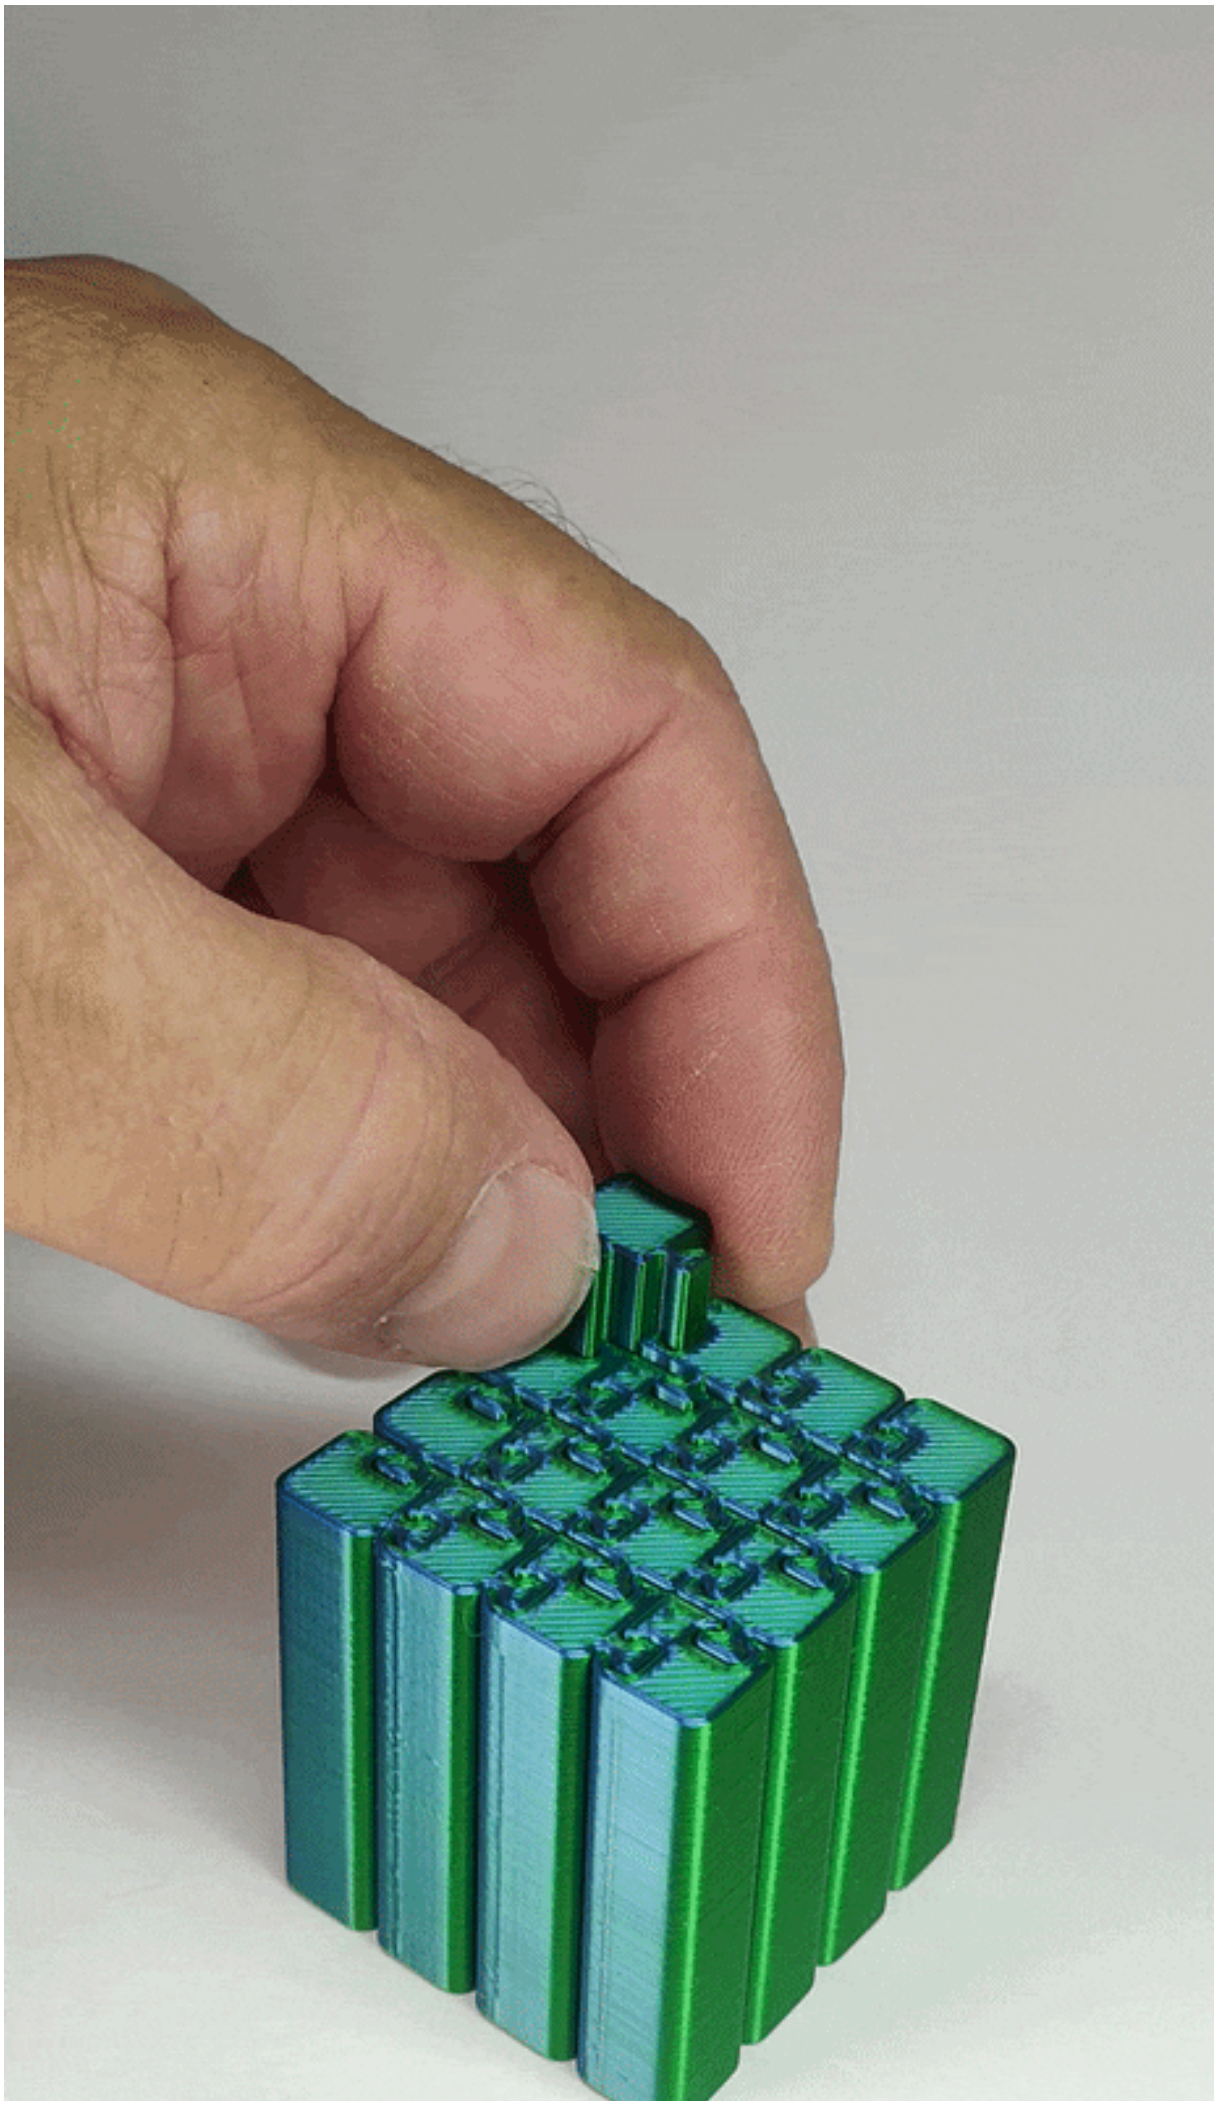
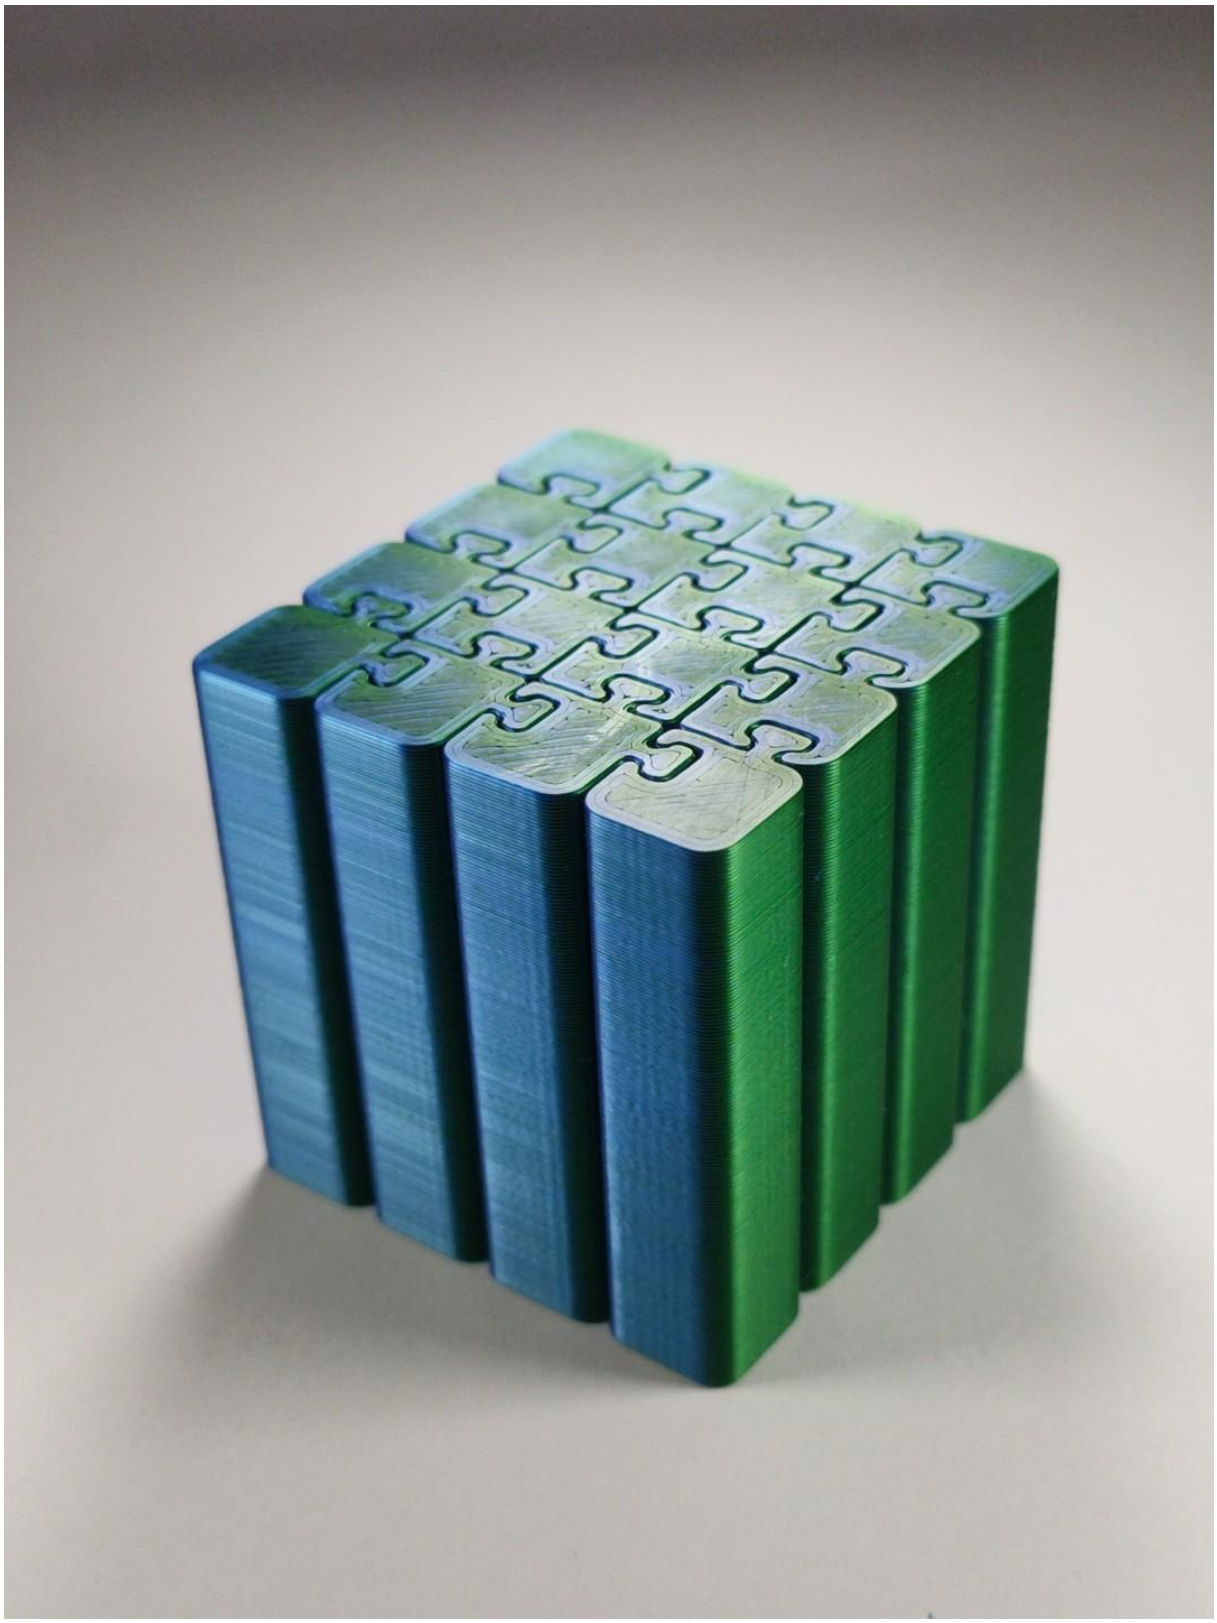
Initially, I didn't even know what this project would turn into. I liked my previous "segmented pumpkin" model, so I decided to try creating a cube where all the parts could move independently.

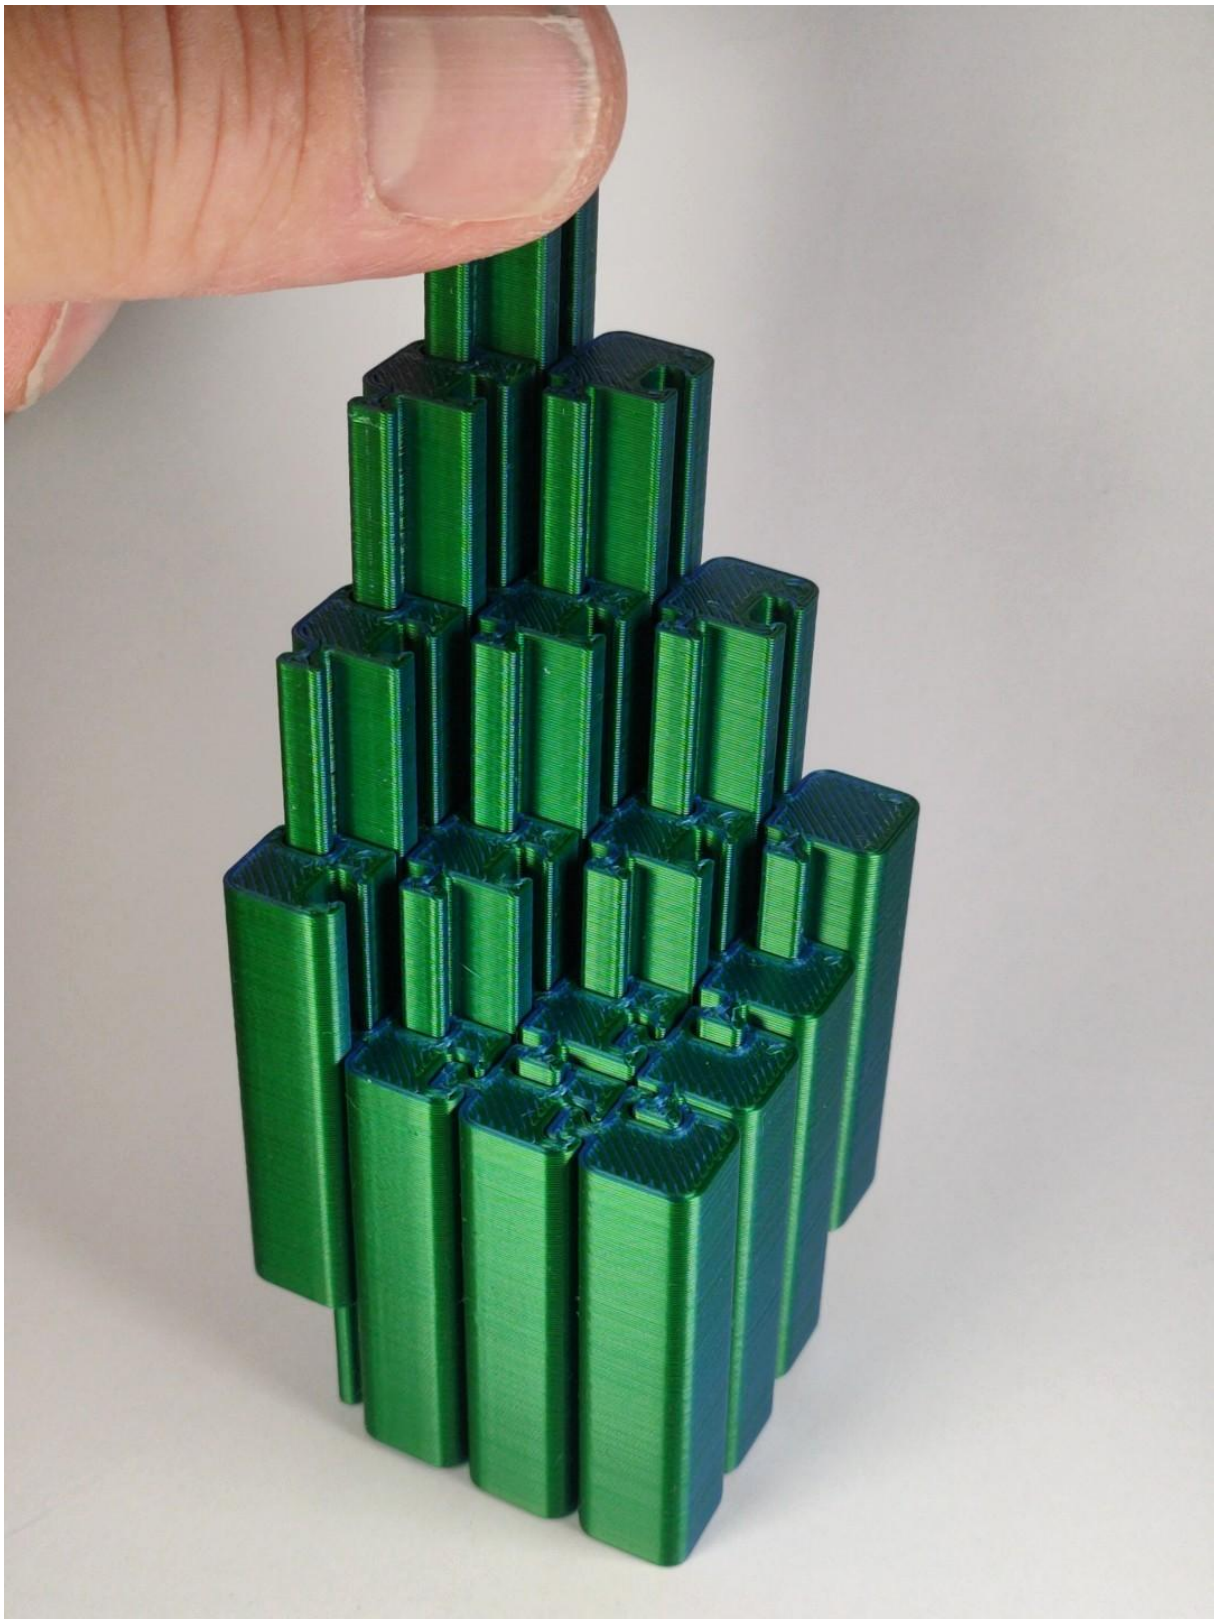
The result is a really fun toy—so far, everyone who has held it has enjoyed it. There are plenty of ways to move it.

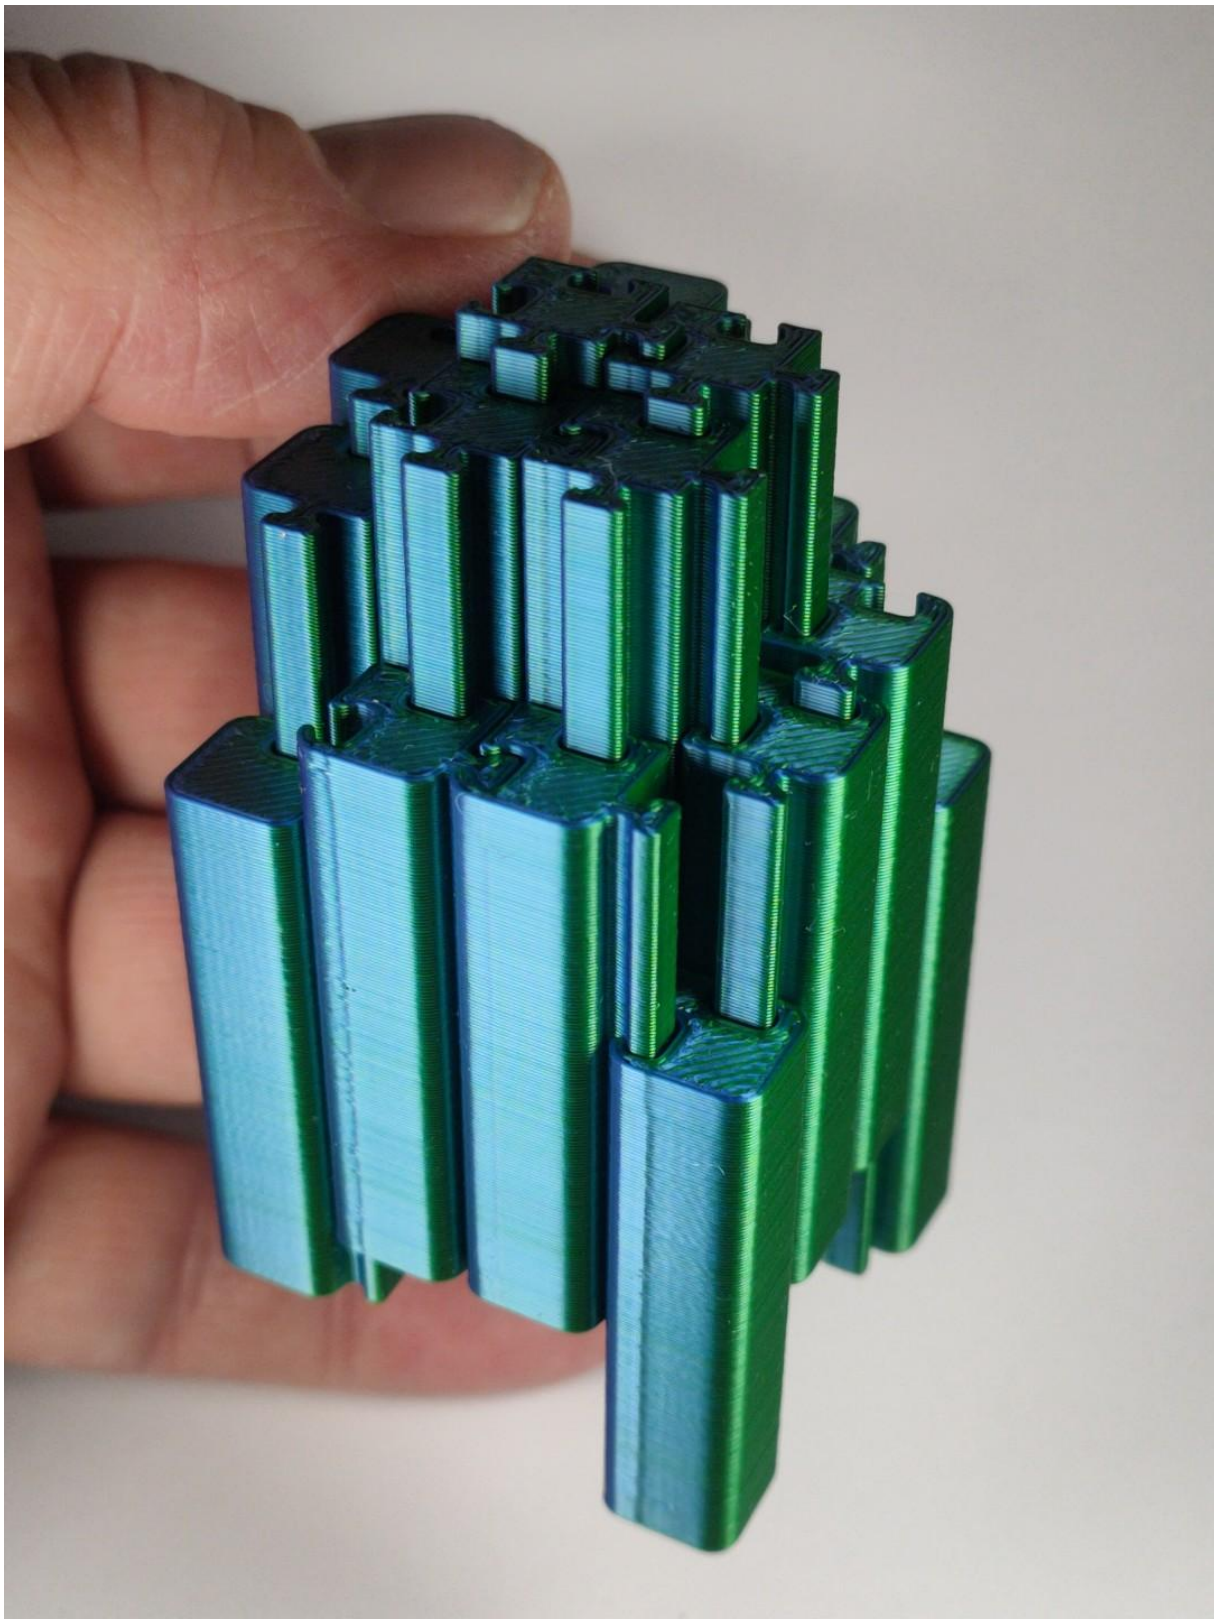
The gap tolerance is 0.25 mm, which most printers should be able to handle.

Please adhere to the model's license terms. It is becoming increasingly common for my models to be stolen, distributed without permission, and resold









You can find a similar, larger model here :
