Summary

This is a simple Center Console Tray I designed for the Chevy Blazer EV

Hobby & Makers > Automotive

Tags: console center

I designed this organizer to fit in the center console of the 2024 Blazer EV. This is only my second attempt at making something original so be kind lol. I used the new Layerling program to make this. Its a mix of TinkerCad and Fusion, and very easy to use. Search for it on Youtube to get some instructions. I printed it with PLA at 2 walls, 15% infill, with normal supports on plate only and it seemed to be solid.

Hope you all will find this useful.
