Summary

Monster Candy Corn Dispenser!

[Seasonal designs](#) > [Autumn & Halloween](#)

Tags: [halloween](#) [candydispenser](#) [candycorn](#)

This Halloween candy corn dispenser is shaped like a mischievous monster, with a bright orange body, oversized eyes, expressive black eyebrows, curved white horns, and small fangs around its wide mouth. A yellow serving tray slides outward beneath the mouth to offer the candy.

A side-mounted hand dial drives the internal mechanism. Candy feeds from a refillable hopper into a rotating metering drum, which is designed to release a small handful into the tray. One dial turn dispenses the candy, approximately three more turns extend the tray, and another three retract it before the cycle repeats.

Inside, reduction gears coordinate the dispensing drum with a cam, roller, and linkage that move the tray. The multipart design is intended for multicolor 3D printing, with a separate Blender cutaway animation showing how the mechanism moves.
