I designed this holder as a simple and compact way to store **metal spray cans on an IKEA SKÅDIS pegboard**.

Instead of enclosing the can with a fixed ring or clamp, the design uses **three 6 × 2 mm magnets** integrated into the vertical part of the holder. The bottom platform supports the weight of the can, while the magnets keep the metal can securely against the holder.

The advantage of this approach is that the holder is **not limited to one specific can diameter**. Different sizes of compatible metal cans can be placed on the same holder, making it useful for WD-40, maintenance sprays and similar workshop products.

The holder attaches to the SKÅDIS board using a flush mounted **T-Clip:**

.

Additional parts required:

- 3 × round neodymium magnets, **Ø6 × 2 mm**
- 1 × **flush T-Clip for IKEA SKÅDIS**

A simple solution for keeping frequently used spray cans organized, visible and easy to grab directly from your workshop wall.

This remix is based on

Skadis T-Clip System
