Hello everyone,

I've created some more magnets here again this time matching the upcoming Halloween. The faces turned out really great and can be printed quickly and easily. I used 8x2mm magnets as always. Some people have asked or mentioned that it wouldn't fit I recommend you get this pair of pliers from Würth it works perfectly as you can also see in my video.

Now I wish you lots of fun printing and distributing them around your city or in the village or even as decoration for your tables. Feel free to leave pictures of your prints and feedback is always welcome. That's the only way we can all improve together.

You already know the rest anyway in that sense

Your filamentos 🙌
