A set of glow in the dark Planets and the Moon that can be hung on a wall. make the room look like a starry sky. They are a simple way to decorate a wall.

Might have to scale down some of the models they are large (they all fit on a core one/+ plate)

Remember that glow in the dark filament are abrasive so it ruins brass nozzles fast, so switch to a hardened steel nozzle

I also have other models of stars, astronauts, aliens, moons, and other things you can find in space.
