Summary

Halloween switch/outlet decoration. Cute 3D print model, easy to mount without glue.

Household > Home Decor

This spooky Halloween model features a classic jack-o'-lantern pumpkin with a frightened cat, making it the perfect decorative accessory for a light switch or electrical outlet. The playful design captures the fun and spooky spirit of Halloween, combining an iconic pumpkin with a startled feline for a charming seasonal decoration. Its sleek silhouette looks especially striking against a light-colored wall.

Mounting:
The model is designed for easy installation using a simple wedge that slides between the wall and the light switch or outlet frame. No glue or additional mounting hardware is required. The decoration can be quickly installed, removed, or repositioned whenever needed.

Dimensions:
The model is designed to fit standard light switch frames. It can easily be rescaled in your slicer to accommodate different switch or outlet dimensions.

3D Printing:
For the best results, print the model using black filament to achieve the

look shown in the photos. PLA is a suitable material for this decorative piece. Adjust your print settings according to your 3D printer, paying particular attention to any thin or delicate details.

This 3D model is created solely for educational, artistic, and personal use.
