Description

Restroom Signs – M & W

A fun and stylish set of **3D-printed restroom signs** designed for bars, restaurants, cafés, pubs, home workshops, or any place where ordinary bathroom signs are just too boring.

The **M (Male)** sign features a bottle-shaped cutout, while the **W (Female)** sign features a cocktail/martini glass. The symbols are integrated directly into the silhouettes, creating a clean and recognizable design with a small dose of humor.

Both signs include a mounting hole and are designed as **flat, easy-to-print models with no supports required**.

Two separate models are included:

- **M — Male / Bottle**
- **W — Female / Cocktail**

Print them in contrasting colors for an even stronger visual effect, or keep them monochrome for a minimalist look.

3D printing:

- No supports
- Easy to print
- Flat design
- Suitable for PLA, PETG and similar materials
- Can be scaled to suit different door or wall sizes
