Introducing the Halloween in Motion - Moving Pumpkin & Ghost Box Turn the handle and watch the characters rise and fall, creating a playful little Halloween dance.

The toppers are interchangeable, so you can switch between expressive pumpkins and cheeky ghosts whenever you fancy a change. Two different looks for the same spooky display!

The box features bats, pumpkins and “Happy Halloween” lettering, plus an LED panel where you can insert an LED light strip to add a warm, spooky glow.

A fun, interactive Halloween decoration—give the handle a turn and bring your spooky crew to life!

All parts are designed by 3D Magic and are 3D printable.

You can find the attached ZIP with an Excel file containing quantities and how many you need to print, but the bed plates are prepared with all quantities needed, along with a PDF file for assembly instructions.

The box height is intentional: the moving figures need enough room to complete their full travel. I also strengthened the chassis, lid, and LED panel to handle the mechanism. In testing, my first printed lid broke one of its legs, so I revised the design before making the final version.
