Hey everyone!

I'm super excited to share my newest **Fluffy Tails** design with you all — these adorable **Cute Flexi T-Rex Dinosaurs!**

I wanted to bring some prehistoric fun to the Fluffy Tails collection, so I designed these adorable little T-Rexes with chunky bodies, tiny arms, big expressive eyes, cute smiling faces, and playful little teeth! 😊 From the classic earthy brown T-Rex to the vibrant turquoise and blue version, these little dinosaurs are ready to stomp their way into your collection!

And of course, I couldn't leave out the fun, articulated design that makes these models so enjoyable! **Their long, segmented tails are fully articulated**, making them super fun to wiggle, pose, and play with. Plus, with their adorable expressions and colorful details, these tiny prehistoric creatures make perfect little companions for dinosaur lovers of all ages!

What's Included

- Adorable Cute Flexi T-Rex Dinosaur designs
- Cute smiling faces with tiny teeth, little arms, and playful expressions
- Long, fully articulated segmented tails
- Multiple color variations to bring your dinosaurs to life
- Fully articulated, print-in-place design
- Keychain-ready designs, perfect for carrying your favorite dinosaur everywhere
- Multi-color friendly models for experimenting with your own color combinations
- Designed with FDM 3D printing in mind

These little T-Rexes make wonderful keychains, desk buddies, gifts, collectibles, dinosaur-themed decorations, or simply a fun addition to your growing **Fluffy Tails** collection! Whether you're a dinosaur enthusiast or just love cute articulated creatures, these little guys are sure to bring a smile to your face!

IMPORTANT: Printing Notes

- Please clean the build plate with soap and water or IPA before printing
- No supports needed.
- Use brims if you experience adhesion issues.
- Keychain loop size can be adjusted or repositioned if desired (in the .3mf file)
- .3mf file created using Bambu Studio
- Model size : **134 mm.**
- Material used: PLA+
- Printer settings: 0.2 mm layer height, 2 walls, 15% infill
- **To avoid dark filament bleeding**, the filament purge needs to be adjusted accordingly (multiplier at 1.2 - 1.3 or just increase the purge value from dark to light color to 1.3x and multiplier remains 1). **In the .3mf file purge value is already adjusted for the given colors.**
- The .stl file does not contain keychain holes. A negative torus can be added in the slicer respectively if needed
- If you are **using the stl file**, check out this video to create keychain hole in any slicer : <https://www.youtube.com/shorts/c7HgcOIKRgs>
- If you get any non-manifold warnings in your slicer, feel free to ignore them — the model prints perfectly fine

Files Included

- Cute Flexi T-Rex Dinosaur models
- Multi-color ready files
- Ready-to-print color combinations
- STL + 3MF files
- Fully articulated, print-in-place versions

Thank you all so much for supporting my work! ♥ Your support allows me to keep creating fun, cute, and unique articulated characters like these. Every membership gives me the opportunity to spend more time designing new creatures, experimenting with new ideas, and bringing even more adorable characters to life.

I had so much fun working on these little T-Rexes, especially designing their **cute expressions, tiny arms, colorful details, and those long, wiggly articulated tails!**

I can't wait to see which color combination becomes your favorite! If you print one — or create your own completely new dinosaur color combination — please share your makes in the community! I'd absolutely love to see your creations and all the different prehistoric colors you come up with.

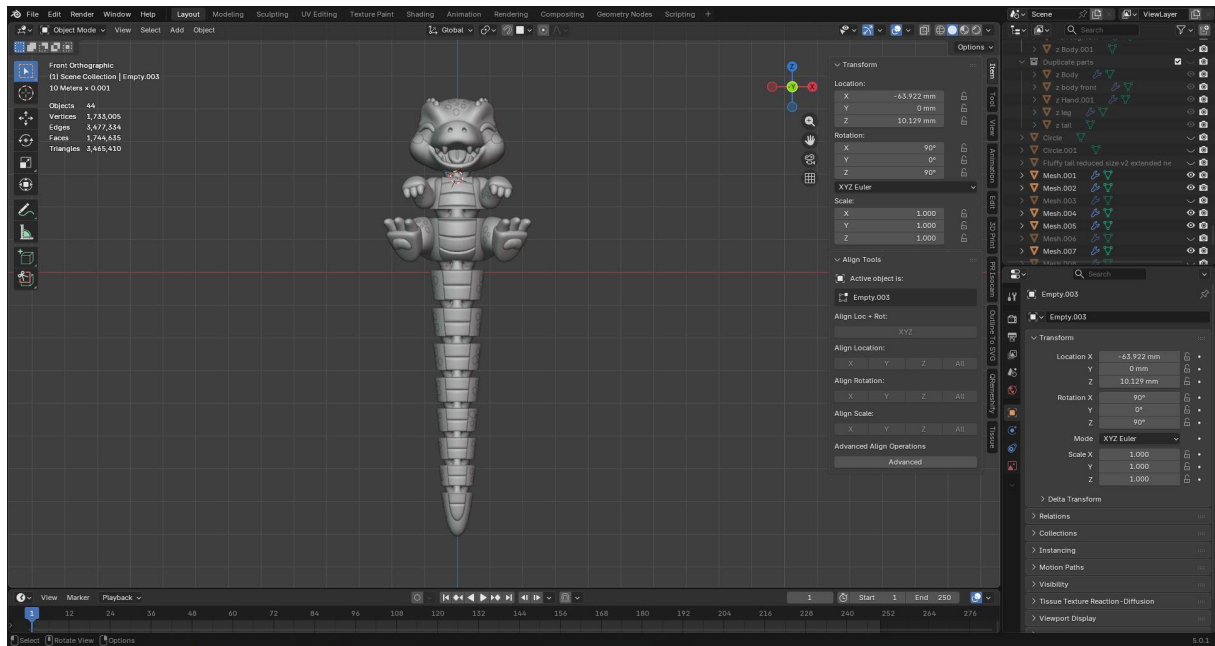

Happy printing!
