This flexi design is easy to print, and super modular. The pieces can be easily snapped together, and can also snap apart. I have also included several different connection pieces to allow for further customization. The pictures demonstrate a few different ways four basic vine pieces can be combined

Printing:

All parts are print-in-place, and do not require supports. I do recommend a brim however. The vines and leaves can be printed together, or separately.

If you have any questions please let me know!

Happy printing!
