---

I wanted a fan mount for my Team Xray SCX'23. You can pick SCX'25 here: <https://www.rcamerica.com/car-and-truck-kits/xray-scx-23-2wd-1-10-short-course-truck-320301>

The blue one is the earlier version; the black one is the latest. You can see the silver dot in the chassis side guard — that can be drilled through, letting you secure the fan holder with a nut on top as well for peace of mind. I didn't get a chance to do that myself. I ran mine with just double-sided tape and it was solid — just make sure you clean the surface with alcohol first.

The fan duct on top is from a different creator. I've attached the file here for convenience.

Also you will need some support. Lay it down with the screws that holds fan down and put support around the tab with little support around the top curve. Support was super easy to remove

If you like the design, please leave a make and comment and please hit the like button.

**Pairing suggestion:** Fan shroud by [Creator Mike Jackson ] — <https://makerworld.com/en/models/2168374> — Licensed under CC BY-NC-ND
